Projects

1. **Task Manager**
   Description: **Personal Task Manager Web Application** designed to help users organize, prioritize, and manage daily tasks efficiently. It includes user registration and login features, task tracking, and email notifications. The project is built using **HTML, CSS, JavaScript** for the frontend, **Flask** framework for backend design, and **MySQL** database management.

2. **Recipe Explorer**
   Description: **RecipeHub** is a full-stack web application where users can explore, search, and view a wide range of recipes with descriptions, ingredients, instructions, and YouTube videos.. Users can search for recipes and view detailed information on a separate page. The data is managed using a Node.js and MongoDB backend.
   Technologies Used: React.js, Node.js, Express.js, MongoDB, CSS Modules, Axios.

3. **Portfolio Website**
   Description: A personal web-based portfolio developed to showcase projects, technical skills, education, and resume. The application is built using React.js for a dynamic and responsive user interface. It highlights expertise in web development through interactive sections and modern UI/UX practices. Deployed as a single-page application for fast and seamless navigation.
